---

"Also when was the QAPP submitted to USEPA and was it approved?"

Atul..... you were told by the U.S. EPA during our March 24, 2009, 1:30 pm call between yourself, Tim Bishop, Steve Faryan, Michelle Majack and myself that the QAPP in URS possession was never submitted or approved by the Agency. As the project progressed in 2003/2004 HWG was required to follow Agency QAPP guidance and was subject to an Agency QAPP audit, if demanded.

HWG choose to produce a QAPP, store it at the site trailer and wait for an Agency audit. The U.S. EPA has never done a QAPP audit of the HWG produced QAPP.
